Clinical Laboratory Test Update

Reducing Sugars, Urine - Discontinued

Effective August 15, 2017, the UCHealth University of Colorado Hospital Clinical Laboratory will no longer offer Urine Reducing Sugars testing due to discontinuation of the necessary reagent by the manufacturer. This test was very rarely requested at University of Colorado Hospital as the newborn screening that occurs in every state proactively identifies most metabolic diseases that might otherwise lead to positive results by this test. If alternative testing is indicated for a unique patient, please contact the Reference Laboratory Send Out section (720-848-7029).

Please call Gregory Bocsi, DO at 720-848-7050 if you have any questions or visit our website at <https://www.uchealth.org/professionals/uch-clinical-laboratory/> for additional information.
