

## Adult Biometric Screenings

Customizable on-site health screenings for your employees

### Benefits to your company

- Multi-day on-site screenings available
- Convenient for employees to increase participation
- Reduce employee's medical costs and missed work days
- Identify current health risks within your organization and provide early intervention of chronic conditions
- Customizable aggregate reports

### Screening results

Within 20 min you receive the following

- Lipid panel (Total chol, HDL, LDL, Triglycerides)
- Blood glucose
- Blood pressure
- BMI and waist circumference
- Heart, stroke, and diabetes risk assessments

### Questions

Stacie Kenny, BSN, RN  
adultwellness@uchealth.org

### Benefits to your employees

- You stay with the same health screener through the entire screening
- We don't believe in "herding" you station to station
- Allows you to feel more comfortable to ask questions regarding your screening results and health that can lead to better lifestyle choices
- Less painful and time consuming than a traditional blood draw
- Results can be uploaded into EPIC (patient medical records) for your health care provider and self to view
- Receive referral to Lifestyle Health or other services

### Additional Testing

Employees can self-pay for additional testing:  
A1C, TSH (thyroid), PSA (Prostate), hs-CRP,  
Creatinine, Vitamin D and Cortisol
