Clinical Laboratory Test Update

Lab Testing and COVID-19 Pandemic

Currently, with the exception of Respiratory Virus Panel testing and some other molecular diagnostics tests, the University of Colorado Hospital Clinical Laboratory is delivering test turnaround times within established parameters.

If the pandemic should begin to significantly impact our testing capabilities, laboratory leadership will consider which tests could be suspended.

In a worst-case scenario, the Clinical Laboratory may need to move to a limited downtime test menu. If this becomes necessary, notification will be made by the UCHA Command Center.

Testing delays are also published in real-time on Enterprise Alert. Enterprise Alert is available on all UCHealth PCs when a UCHealth employee is logged in. If the caduceus is yellow or red, click on the icon for further information.

Detailed System Information	
System	Clinical Laboratory
Location	Central
Title	Testing Delays
Detail	Due to high testing volume, Respiratory and GI PCR testing will be delayed.
Date	Mon (03/16) 8:48 PM

Issued March 17, 2020
