Clinical Laboratory Test Update

Referral Lab Updates – Immunoglobulin E (IgE) and Alzheimer's Disease Evaluation CSF

In an effort to standardize testing across the UCHealth system, UCHealth laboratories will send Immunoglobulin E (IgE, LAB74) testing to Poudre Valley Hospital Clinical Laboratory, effective 8/1/2020. The test method will remain the same (ImmunoCAP).

Alzheimer's Disease Evaluation CSF (LAB7598) testing is performed at MAYO Clinic Laboratories and requires collection in a CSF AD Biomarker tube, which is supplied by the Clinical Laboratory. Contact us at 720-848-4401 to obtain collection tubes. Specimens not collected in the CSF AD Biomarker tube will be rejected.

Please call UCH Clinical Lab Sendouts at 720-848-7029 if you have any questions or visit our test directory at <https://www.testmenu.com/universityhospital> for additional information.
