

Need to know your costs ahead of time?

Get estimates in real time, over the phone or online.

We can provide real-time estimates for select patient procedures and services.

This added transparency can help you understand your financial obligations and get help with paying for costs before you even receive care.

- You provide a CPT code (given to you by your provider or clinic) to receive an estimate in advance.
- Some procedure estimates are available online via your My Health Connection account.
- Estimates may be quoted with or without insurance. When confirming insurance, your deductible and out-of-pocket maximum contributions will be factored into an estimate.
- Estimates over the phone are also provided in writing upon request.

Note: Estimates are not a guarantee of service. Estimates do not include non UCHHealth-employed physician fees, which may be determined at the time of service.

Patient estimates will not provide cost estimates for special discount self-pay packages provided by individual clinics, transplant services, urgent care or emergency department visits. Please contact your individual clinic for an estimate on a self-pay package.

Any estimate given in real time will follow in writing upon request.

In the event an estimate cannot be determined immediately, the team will follow up with an estimate within two business days.
