Clinical Laboratory Test Update

Von Willebrand Activity - Delay in Testing

Effective November 27, 2023 the University of Colorado Hospital Clinical Laboratory's reagent for Von Willebrand Activity testing is expected to be backordered until mid to late December 2023.

Patient samples will be sent to the ARUP reference lab for testing.

| EPIC code | LAB3539 | | | | | | | | | | | | | | | | | |
|-------------------------------|---|--|-----|--------------------|-----------|---------|-----------|---------|-------------|---------|-------------|---------|-------------|---------|-------------|---------|--------------------|---------|
| Synonym | Von Willebrand Activity | | | | | | | | | | | | | | | | | |
| Collection | One 2.7 mL Blue top (sodium citrate 3.2%). Fill tube to at least 90% capacity. | | | | | | | | | | | | | | | | | |
| Storage/Transport Temperature | 1.5 mL platelet poor plasma | | | | | | | | | | | | | | | | | |
| Sample Stability | Ambient plasma: 4 hrs; Refrigerated plasma; unacceptable; Frozen plasma, - 20 °C, 3 months | | | | | | | | | | | | | | | | | |
| Unacceptable | Serum, EDTA plasma, clotted or hemolyzed specimens | | | | | | | | | | | | | | | | | |
| Testing Performed | Monday through Saturday | | | | | | | | | | | | | | | | | |
| Reported | 1 – 3 days | | | | | | | | | | | | | | | | | |
