Clinical Laboratory Test Update

Troponin Testing Discontinued In-House at CCMC Clinical Laboratory

Effective March 17, 2026, troponin testing will no longer be performed in-house at the UCHealth Cherry Creek Medical Center (CCMC) Clinical Laboratory. This change is due to our current troponin reagent no longer being available through the manufacturer.

CCMC will continue to **collect troponin specimens**, however all samples will be **sent to AMC for testing**. This will result in an **increased turnaround time of up to approximately 4 hours**.

Please take this change into consideration when ordering troponin testing and managing patient care.

If you have any questions, please contact Ekaterina Carlisle at 720.516.9132.
