Clinical Laboratory Test Update

Fecal Immunochemical Test (FIT) Kit Update

Effective March 11, 2026, the FIT test kit (used for fecal occult blood orders) will be updated to a new version. Supply Chain will begin removing all outdated FIT kits from stocked areas and replacing them with the updated kits.

Please ensure that any clinic-managed storage locations—including drawers, cabinets, or other areas not routinely accessed by Supply Chain—are checked, cleared of old kits, and restocked with the new version.

The laboratory will no longer accept the old FIT kits after May 1, 2026. Any specimens submitted using outdated kits on or after this date will be rejected.

Please email Megan Batliner at megan.batliner@uhealth.org or Dr. Alabi at adekunle.alabi@cuanschutz.edu if you have any questions or visit our test catalog at <https://www.testmenu.com/universityhospital> for additional information.
