

Northern Colorado Foundation

Long COVID Support Group

Long COVID can impact nearly every aspect of a person's life—physically, mentally, and emotionally. For many, symptoms such as chronic fatigue, brain fog, and shortness of breath persist for weeks, months, or even years after the initial infection.

At UCHealth, our specialists provide compassionate, comprehensive, and up-to-date care across multiple settings—through individual providers, multidisciplinary clinics, clinical trials, and ongoing support groups.

Your gift to the Long COVID Fund helps patients in our community access the care, education, and support they need to heal and thrive. Funds support vital resources, including:

- Program enhancements that improve care delivery and strengthen community impact
- Staffing, training and outreach
- Program supplies

Together, we can advance care and bring hope to those still feeling the effects of COVID-19.
